

## ***Leon I. Goldberg Early Investigator Award***

The *Leon I. Goldberg Early Investigator Award* was established in 1986 to honor a young scientist for accomplishments in the field of clinical pharmacology or translational science achieved early in the candidate's career.

The goal of the *Leon I. Goldberg Early Investigator Award* is to encourage and recognize these scientists active in the fields of clinical pharmacology or translational science.

### **Eligibility**

The nominee can be an academic, industrial, or regulatory scientist who has made a substantial contribution to clinical pharmacology or translational science within 10 years of the completion of an advanced degree and/or a post-doctoral fellowship or residency program. An important aspect is that the recipient will be able to deliver an engaging presentation about the impact of their research.

The award is intended to foster the candidate's potential for significant contributions to the future of clinical pharmacology or translational science.

There are no restrictions concerning the scientific field in which nominees have earned their doctoral degrees. Although it is encouraged, a nominee need not be a member of the Society.

### **Diversity, Equity, and Inclusion**

ASCPT is committed to recognizing and promoting excellence in research, collaborations, and efforts that highlight dimensions of diversity. Nominators should address how the candidate has fostered a diverse and inclusive environment.

### **Prize and Presentation**

The *Leon I. Goldberg Early Investigator Award* is presented at the ASCPT Annual Meeting. The recipient will present a lecture summarizing the work that forms the basis of the award. In addition, the recipient of the award will receive a plaque and a \$1,000 prize. Travel expenses, hotel expenses, and meeting registration will be reimbursed by the Society.
