Dear

On behalf of the Scientific Program Committee, I invite you to attend the 119th Annual Meeting of the American Society for Clinical Pharmacology and Therapeutics (ASCPT) March 21-24, 2018 in Orlando, FL.

The conference will feature cutting-edge education in the field of clinical pharmacology, translational medicine and therapeutics. The scientific information will focus on innovations in clinical pharmacology and translational medicine that span the continuum of discovery, development, regulation, and utilization (DDRUE) of drugs in humans. This Annual Meeting is sure to capture many interests and learning opportunities for a scientist like you in this stage of your career in clinical pharmacology.

ASCPT is also offering two pre-conferences in conjunction with the ASCPT Annual Meeting. Both are taking place on March 21, 2018; the *Pediatric Drug Development: Challenges and Opportunities in Extrapolation* is to be held from 10:00 AM – 5:00 PM and the *Pharmacometrics Meets Health Economics: Quantitative Approaches in the Translation from Efficacy to Real World Effectiveness and to Cost-Effective Patient Care* pre-conference will be held at 1:00 – 5:00 PM. These pre-conferences have been designed for scientists and health professionals engaged in all aspects of clinical pharmacology and translational medicine, including educators, regulatory officials, consultants, industry professionals, students, trainees and fellows.

If you need additional information, please contact the ASCPT staff at (703) 836-6981 x109 or by email at meetings@ascpt.org.

I look forward to your participation at the ASCPT 2018 Annual Meeting.

Sincerely,

Peter H. O'Donnell, MD
Scientific Program Committee Chair
