**NIH Research Training and Career Development Programs**

NIH supports Research Training and Career Development programs to help prepare individuals for careers in biomedical, behavioral, social, and clinical research. This site is organized to help you target your particular educational or career stage to find out what programs are available for you. It is important to keep in mind that program details and areas of emphasis may vary across NIH Institutes and Centers. Therefore, you are encouraged to contact an Institute or Center Training Representatives to discuss specific programs and how they fit your training and career goals.

**https://researchtraining.nih.gov/**
Institutional Training Grants

To provide institutional research training opportunities (including international) to trainees at the undergraduate, graduate, and postdoctoral levels

1. Select Role
   - Awardee
   - Appointee

2. Select Career Level
   - Graduate/Clinical Doctorate

Ruth L. Kirschstein Institutional National Research Service Award

To enable institutions to make National Research Service Awards to individuals selected by them for predoctoral and postdoctoral research training in specified shortage areas. The goal of this program is to prepare qualified predoctoral and/or postdoctoral trainees for careers that have a significant impact on the health-related research needs of the Nation.

Details | View Current Funding Opportunities

Ruth L. Kirschstein NRSA Short-Term Institutional Research Training Grant

To provide individuals with research training during off-quaters or summer periods to encourage research careers and/or research in areas of national need. The goal of this program is to support short-term research training for students in health professional schools during the summer, or for predoctoral and/or postdoctoral training in focused, often emerging scientific areas.

Individual Fellowships

To provide institutional research training opportunities (including international) to trainees at the undergraduate, graduate, and postdoctoral levels

1. Select Role
   - Awardee
   - Appointee

2. Select Career Level
   - Graduate/Clinical Doctorate

F30
Ruth L. Kirschstein Individual Predoctoral NRSA for MD/PhD and other Dual Degree Fellowships
The purpose of this program is to enhance the integrated research and clinical training of promising predoctoral students, who are matriculated in a combined MD/PhD or other dual-doctoral degree training program (e.g. DO/PhD, DDS/PhD, AuD/PhD, DVM/PhD), and who intend careers as physician-scientists or other clinician-scientists.

Details  View Current Funding Opportunities

F31
Ruth L. Kirschstein Predoctoral Individual National Research Service Award
The purpose of this program is to enable promising predoctoral students to obtain individualized, mentored research training from outstanding faculty sponsors while conducting dissertation research. The proposed mentored research training is expected to clearly enhance the individual’s potential to develop into a productive, independent research scientist. The F31 is also used to enhance workforce diversity though a separate program.

Research Career Development Awards

To provide institutional research training opportunities (including international) to trainees at the undergraduate, graduate, and postdoctoral levels

1. Select Role
   - Awardee
   - Appointee

2. Select Career Level
   - Early Career

https://researchtraining.nih.gov/programs/career-development
Mentored Clinical Scientist Research Career Development Award

The purpose of this program is to prepare qualified individuals for careers that have a significant impact on the health-related research needs of the Nation. This program provides support and protected time to individuals with a clinical doctoral degree for an intensive, supervised research career development experience in the fields of biomedical and behavioral research, including translational research.

Details  View Current Funding Opportunities

Career Transition Award

The goal of this program is to facilitate the transition of investigators to independent, productive research careers. One or two phase award; an initial period of mentored research (Phase I), followed by a period of independent research at an extramural institution (Phase II). One phase awards include only Phase II.

Details  View Current Funding Opportunities

Mentored Patient-Oriented Research Career Development Award

The purpose of this program is to support the career development of individuals with a clinical doctoral degree, who have the potential to develop into productive, clinical investigators, and who have made a commitment to focus their research endeavors on patient-oriented research.

Details  View Current Funding Opportunities

Mentored Quantitative Research Career Development Award

The purpose of this award is to attract to NIH-relevant research those investigators whose quantitative science and engineering research has thus far not been focused primarily on questions of health and disease. The K25 supports productive professionals with quantitative (e.g., mathematics, statistics, economics, computer science, imaging science, informatics, physics, chemistry) and engineering backgrounds to integrate their expertise with NIH-relevant research.

**Special Note:** Because of the differences in individual Institute and Center (IC) program requirements for this FOA, prospective applicants are strongly encouraged to review [Requirements and Staff Contacts](#) to make sure that their application is responsive to the requirements of one of the participating NIH ICs.

| Funding Opportunity Title | Mentored Patient-Oriented Research Career Development Award (Parent K23) |
How to Apply for an NIH Fellowship?

• Find a mentor who has time for you
• Determine which K award is right for you
  • Degree (basic science vs clinical)
  • Time in current position (early/mid/late-stage)
• Develop a draft career development plan (training + research + mentoring)
• Talk to a program officer at the NIH Institute or Center (IC) you are considering applying to
