

Leon I. Goldberg Early Investigator Award

The *Leon I. Goldberg Early Investigator Award* was established in 1986 to honor a young scientist for accomplishments in the field of clinical pharmacology achieved early in his/her career.

The goal of the *Leon I. Goldberg Early Investigator Award* is to encourage and recognize these scientists active in the field of clinical pharmacology.

Eligibility

The nominee can be an academic, industrial, or regulatory scientist who has made a substantial contribution to clinical pharmacology within 10 years of the completion of an advanced degree and/or a post-doctoral fellowship or residency program. An important aspect is that the recipient will be able to deliver an engaging presentation about the impact of their research. The award is intended to foster the candidate's potential for significant contributions to the future of clinical pharmacology.

There are no restrictions concerning the scientific field in which nominees have earned their doctoral degrees. Although it is encouraged, a nominee need not be a member of the Society.

Prize and Presentation

The *Leon I. Goldberg Early Investigator Award* is presented at the ASCPT Annual Meeting. The recipient will deliver a lecture on his/her work. In addition, the recipient of the award will receive a plaque and a \$1,000 prize. Travel expenses, hotel expenses and meeting registration are reimbursed by the Society.
