

Sheiner-Beal Pharmacometrics Award

The *Sheiner-Beal Pharmacometrics Award* has been established as an ASCPT Award by the Department of Bioengineering and Therapeutic Sciences, University of California, San Francisco (UCSF) to acknowledge the pioneering contributions of Drs. Lewis B. Sheiner and Stuart Beal to the scientific discipline of pharmacometrics.

Definition

Pharmacometrics is defined as the science that quantifies drug, disease, and clinical trial information to aid efficient drug development, regulatory decisions, and rational therapeutic decision making in patients. It uses models that are generally based on pharmacology, physiology, genetic constitution and/or disease for quantitative analysis of interactions between drugs and patients. The domain of pharmacometrics includes the application of techniques that address the interactions between pharmacokinetics, pharmacodynamics, pharmacogenomics, and disease progression with a focus on populations and variability in the exposure-response relationship.

Goal

The goal of the *Sheiner-Beal Pharmacometrics Award* is to recognize outstanding achievements at the forefront of research or leadership in pharmacometrics and/or application of pharmacometric concepts and techniques to enhance research, development, regulatory evaluation, and/or utilization of therapeutic products.

Eligibility

The candidate must be an investigator or leader who is actively advancing the scientific discipline of pharmacometrics and/or its impact on research, development, regulatory evaluation, or utilization of therapeutic products, and is capable of delivering an engaging talk on pharmacometrics. ASCPT is exploring new interactive formats designed to encourage meaningful audience participation during the ASCPT 2027 award presentations. The format of the recipient's award session will be finalized following completion of the award selection process. The award is intended to recognize clinical pharmacologists, clinician scientists, computational scientists, statisticians and others in academia, industry, government agencies, or consulting whose work falls within the scope of the definition of pharmacometrics.

Diversity, Equity, and Inclusion

ASCPT is committed to recognizing and promoting excellence in research, collaborations, and efforts that highlight dimensions of diversity. Nominators should address how the candidate has fostered a diverse and inclusive environment.

Prize and Presentation

The *Sheiner-Beal Pharmacometrics Award* will be presented annually at the ASCPT Annual Meeting. The recipient will deliver an engaging talk summarizing the works that form the basis of the award. In addition, the recipient will receive a \$1,500 prize and a plaque. Travel expenses, hotel expenses, and meeting registration will be reimbursed by the Society.

Previous Recipients

2026 - Cynthia J. Musante, PhD

2025 - Ene Ette, PhD

2024 - Amy Racine-Poon, PhD

2023 - René Bruno, PhD

2022 - Daniel Weiner, PhD

2021 - Steven Shafer, MD

2020 - Marc Gastonguay, PhD

2019 - Joga Gobburu, PhD

2018 - France Mentré, MD, PhD
2017 - Carl C. Peck, MD
2016 - N/A
2015 - Thomas M. Ludden, PhD
2014 - Mats Karlsson, PhD
2013 - William J. Jusko, PhD
2012 - Malcolm Rowland, DSc, PhD
2011 - Donald R. Stanski, MD (Inaugural Recipient)
